What is Mozzaz?

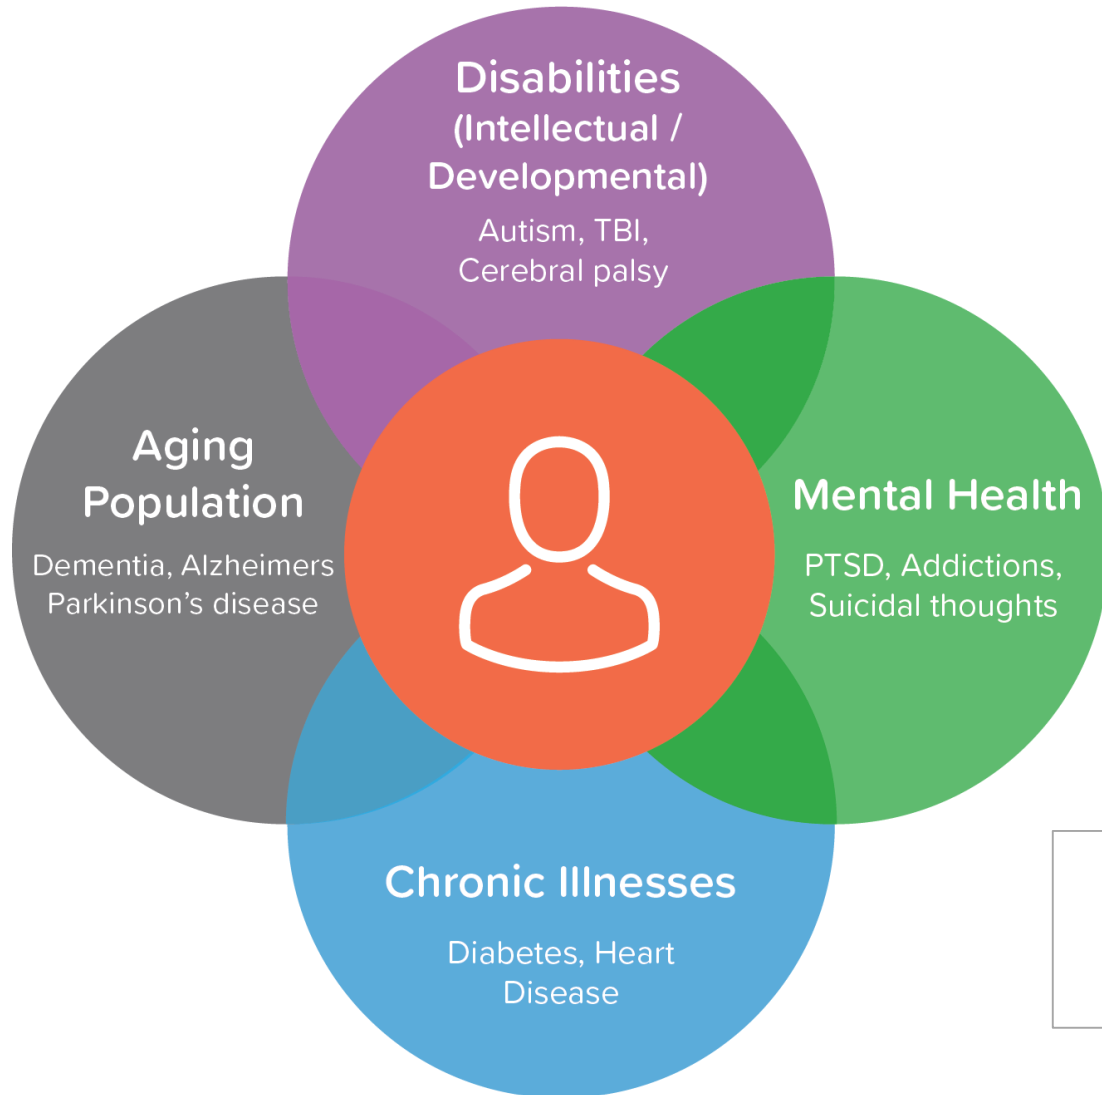

We're a digital health company delivering person-centered connected-care across the health system.

mHealth for Complex Care:

- Patient Engagement
- Patient Management
- "Smart" Analytics

Our Focus: Complex Care Populations

IMPACT

- Lifelong, long-term conditions
- Multiple care providers
- High levels of co-morbidity
- Expensive continuous-care

Personalized interventions & plans of care with person-drive outcomes.

Person-Centered Desired Outcomes

Focus	Desired Outcome
Participant Access	Individuals have access to home and community-based services and supports in their communities.
Participant-Centered Service Planning and Delivery	Services and supports are planned and effectively implemented in accordance with each participant's unique needs, expressed preferences and decisions concerning his/her life in the community.
Provider Capacity and Capabilities	There are sufficient HCBS providers and they possess and demonstrate the capability to effectively serve participants.
Participant Safeguards	Participants are safe and secure in their homes and communities, taking into account their informed and expressed choices.
Participant Rights and Responsibilities	Participants receive support to exercise their rights and accept personal responsibilities.
Participant Outcomes and Satisfaction	Participants are satisfied with their services and achieve desired outcomes.
System Performance	The system supports participants efficiently and effectively and constantly strives to improve quality.

The Mozzaz Solution

PAYER

- ✓ Compliancy and outcomes Reporting
- ✓ Risk stratification to impact Level of Care
- ✓ Gaps in service/utilization reviews

PATIENT

- ✓ Personalized Care Plans
- ✓ Connecting with Care Team
- ✓ Connecting Devices and Wearables

PROVIDER

- ✓ Remote care delivery
- ✓ Automatic data collection
- ✓ Measure outcomes

The Mozzaz Approach

Enterprise Healthcare Ready

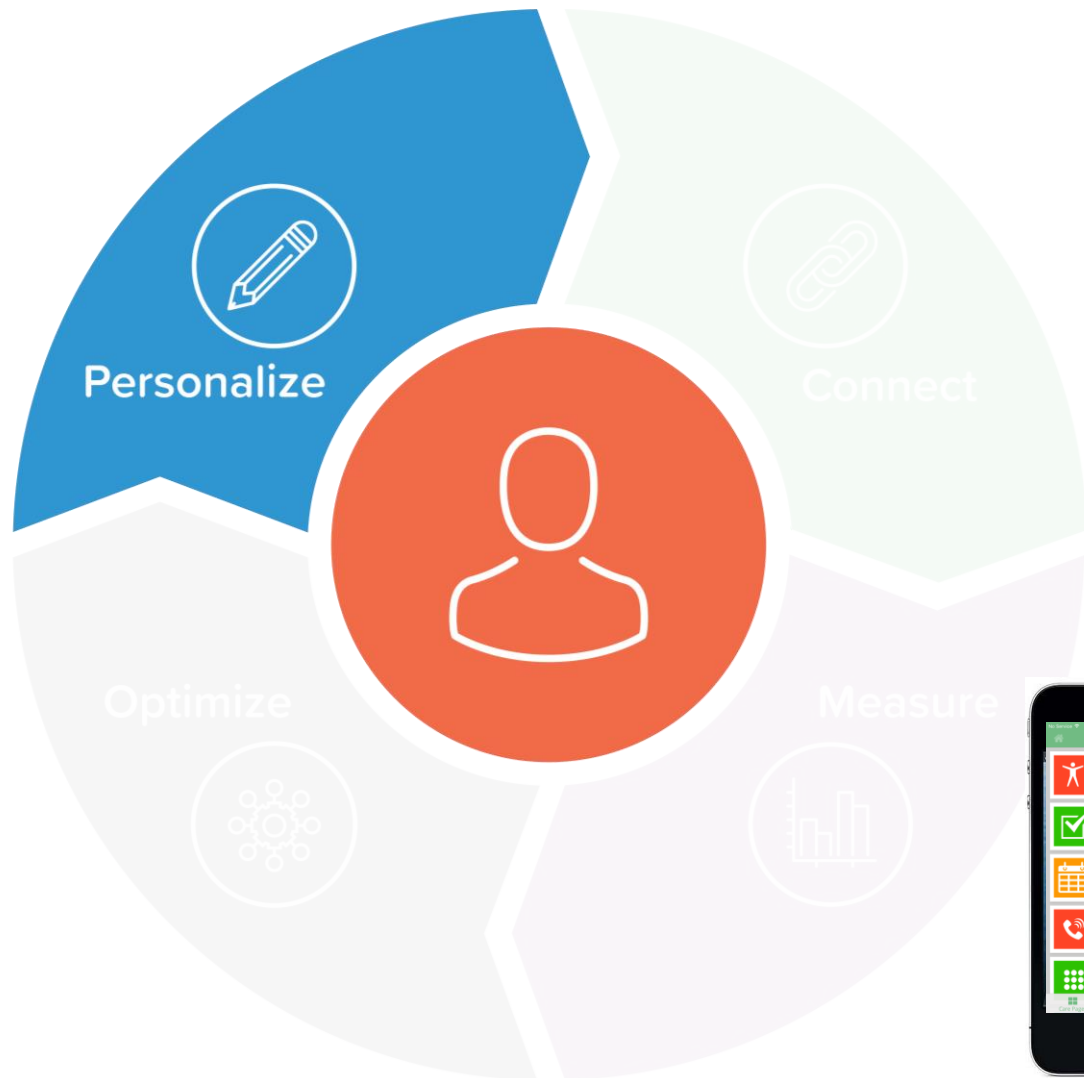

OBJECTIVE

Tech-enable Care Teams to activate patient-engagement to drive:

- ✓ Care Plan Adherence
- ✓ Positive Outcomes
- ✓ Reduce Costs

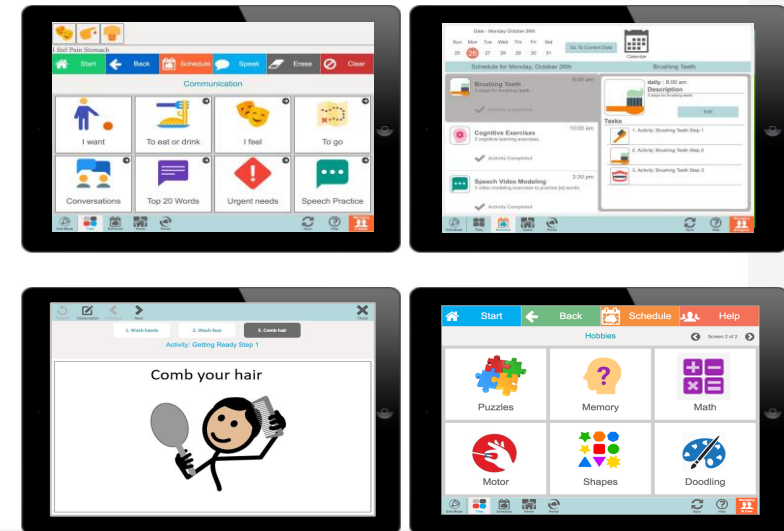

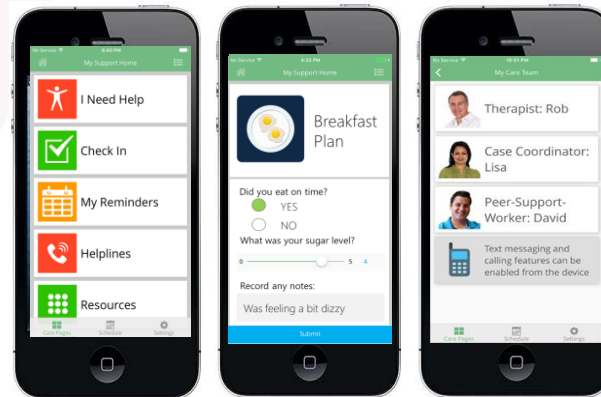

The Mozzaz Approach

PERSONALIZE

Personalization of digital care and the user experience.

- ✓ Improved adherence to the personal care plan
- ✓ Increased levels of individual engagement
- ✓ Increased retention rates and adoption

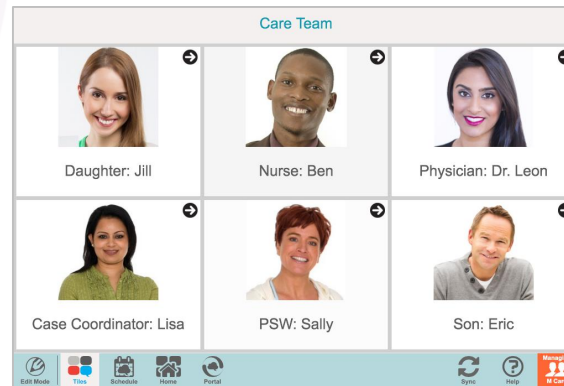

The Mozzaz Approach

CONNECT

Connected-care across care teams and health systems.

- ✓ Improved person-centered care coordination
- ✓ Reduce costs through health system integrations
- ✓ Enhance care with connectivity to better data

The Mozzaz Approach

MEASURE

Enable measurement of progress and outcomes.

- ✓ Increase preventative care through monitoring
- ✓ Deliver proactive care through “smart” alerts
- ✓ Improved insight through multidata measurements

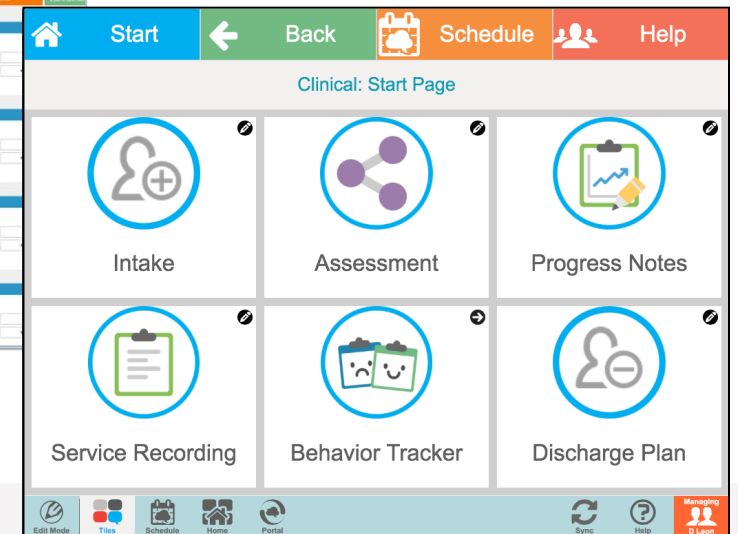

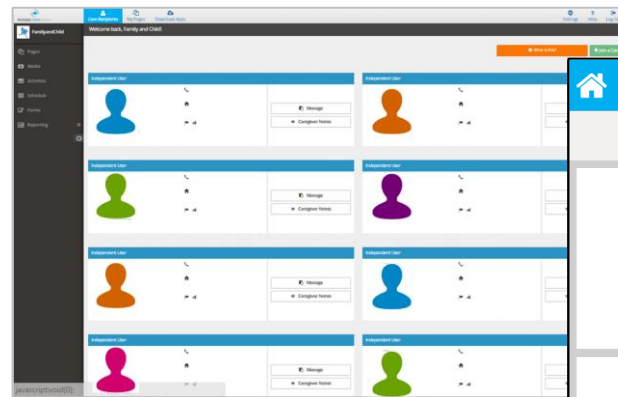

The Mozzaz Approach

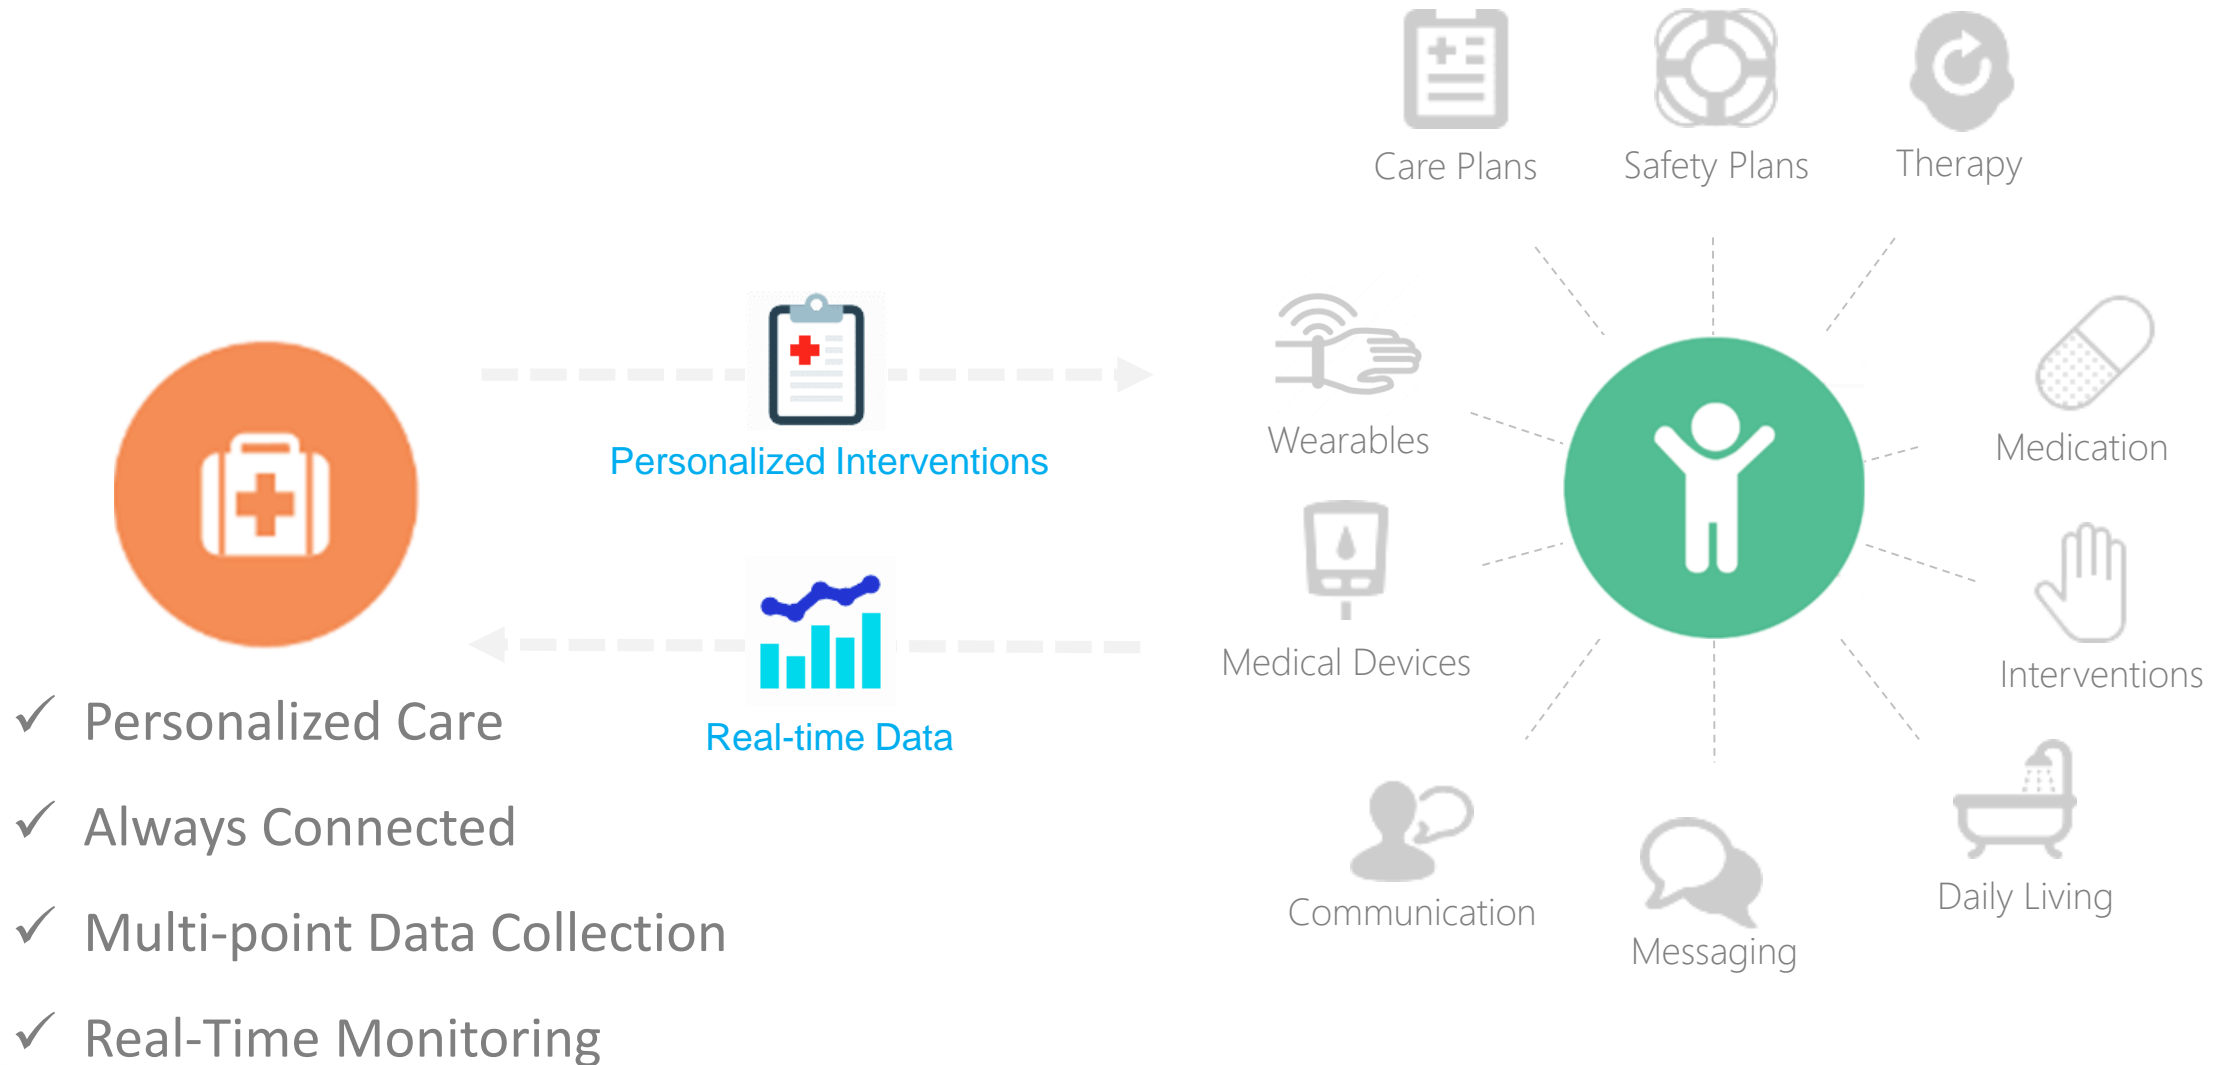

OPTIMIZE

Data-driven care plan updates and adjustments.

- ✓ Improved care management through data analytics
- ✓ Minimized episodes through preventative care
- ✓ Improved outcomes through timely adjustments

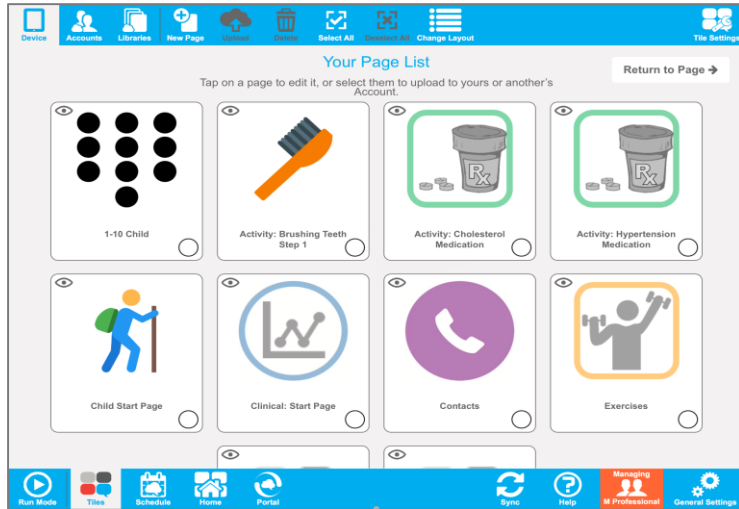

Person-Centered Connected Care

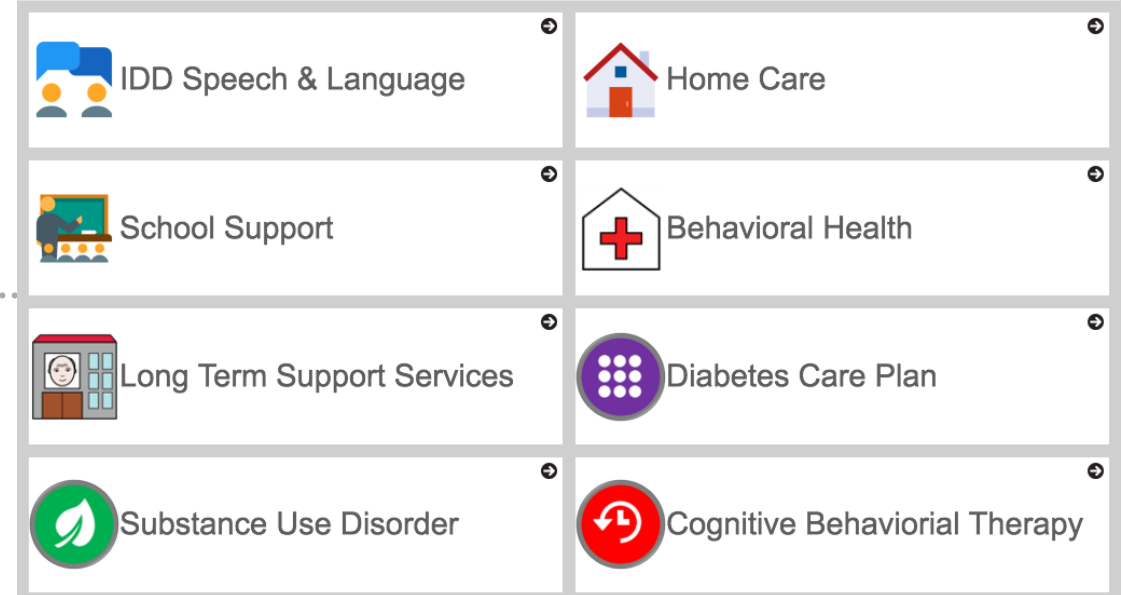

Mobile Intervention Platform (MIP™)

Pre-built Content Libraries (Evidence-based)

Content Builder for quick personalization

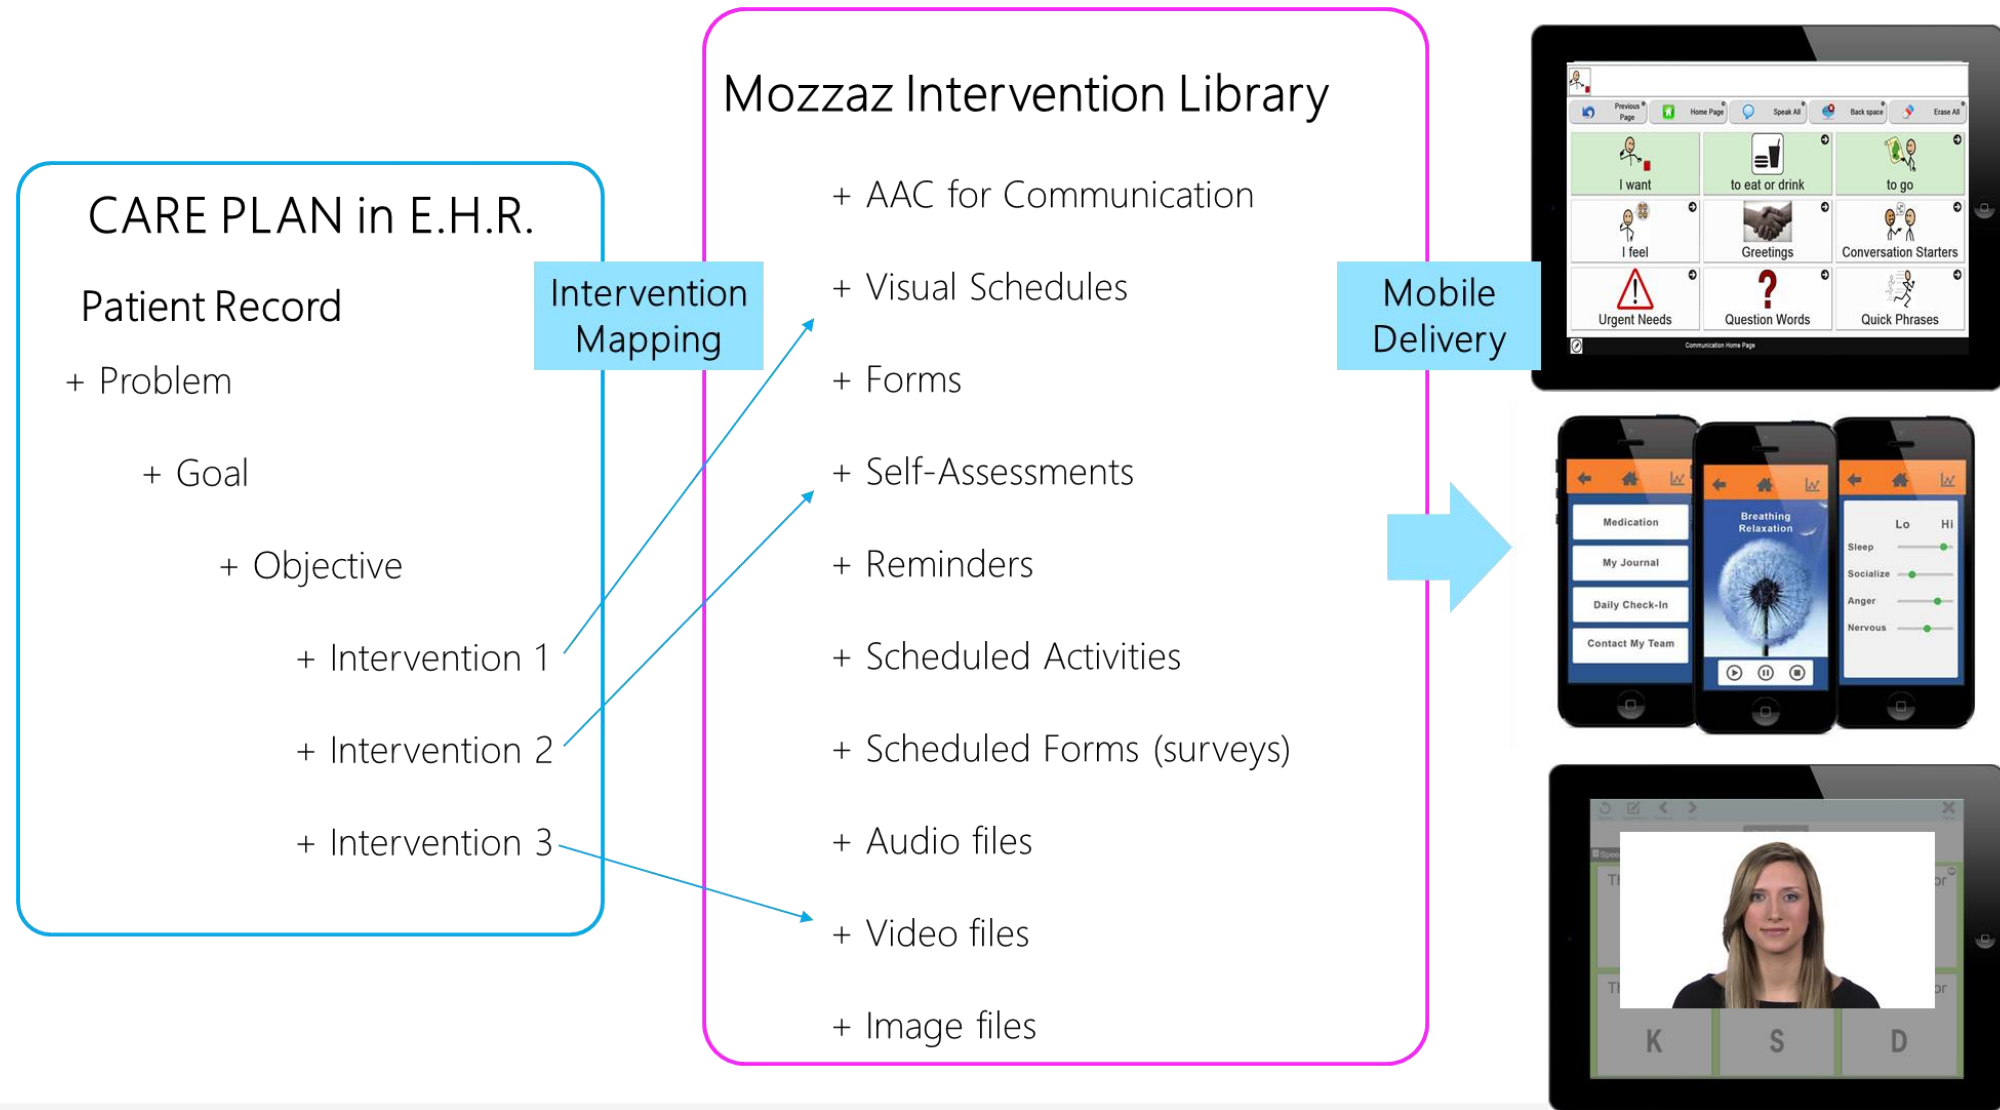

Patient Content Sets

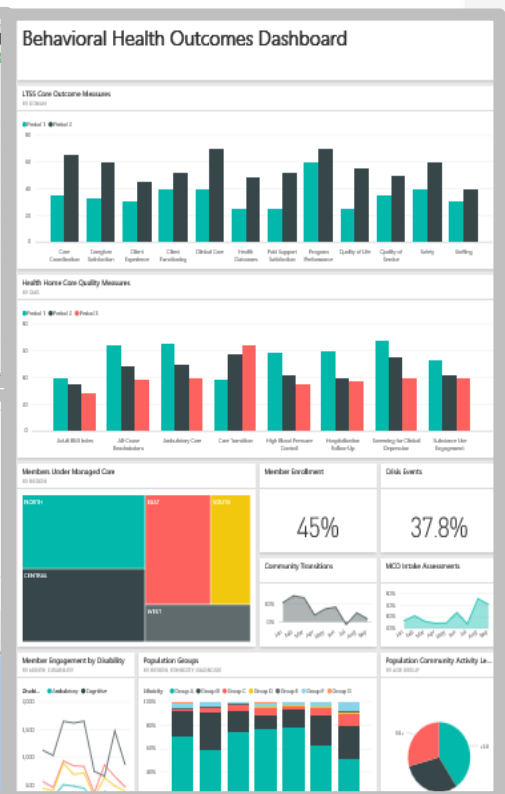

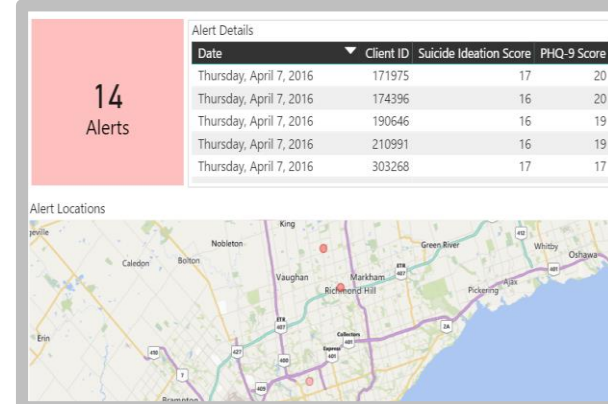

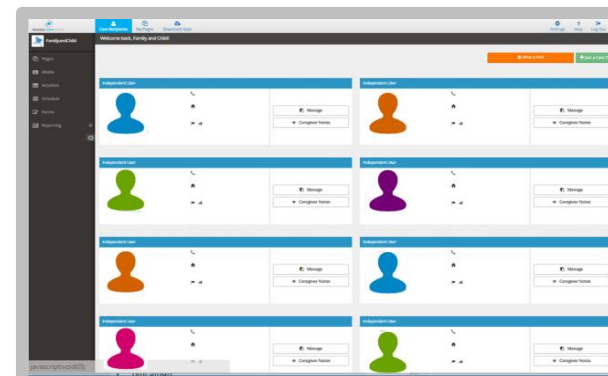

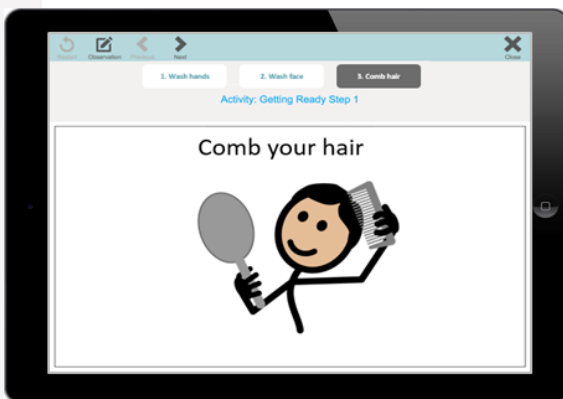

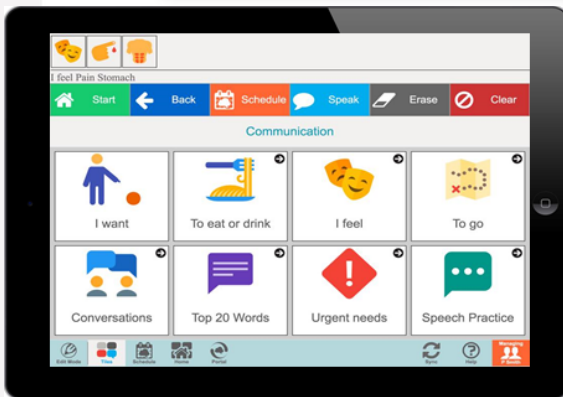

Personalized
Care Plans

MIP™ allows digitizing evidence-based interventions and care plans to be stored as libraries for re-use and personalization helping deliver care faster with measurable outcomes.

Closing the “Clinical Loop” through Interoperability

Tech Enabling HCBS

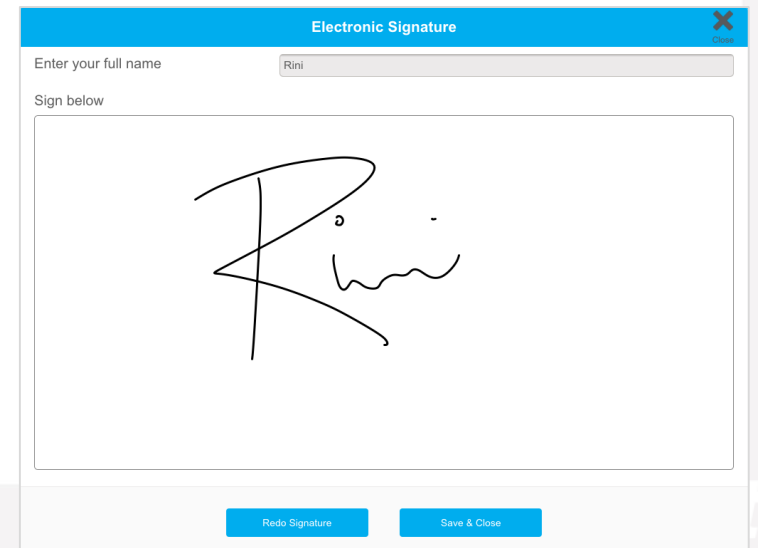

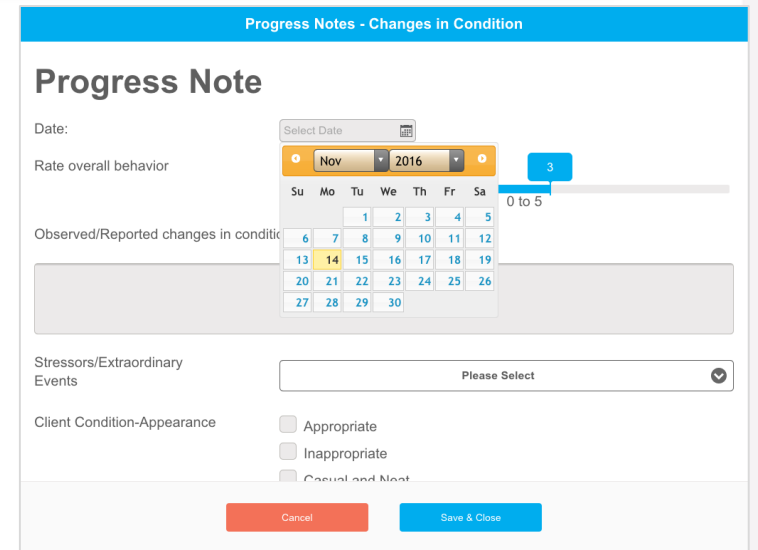

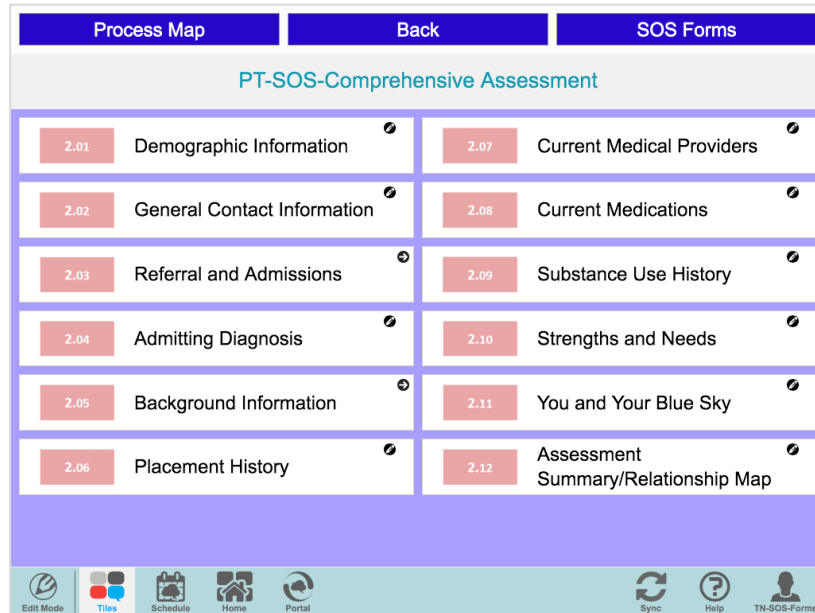

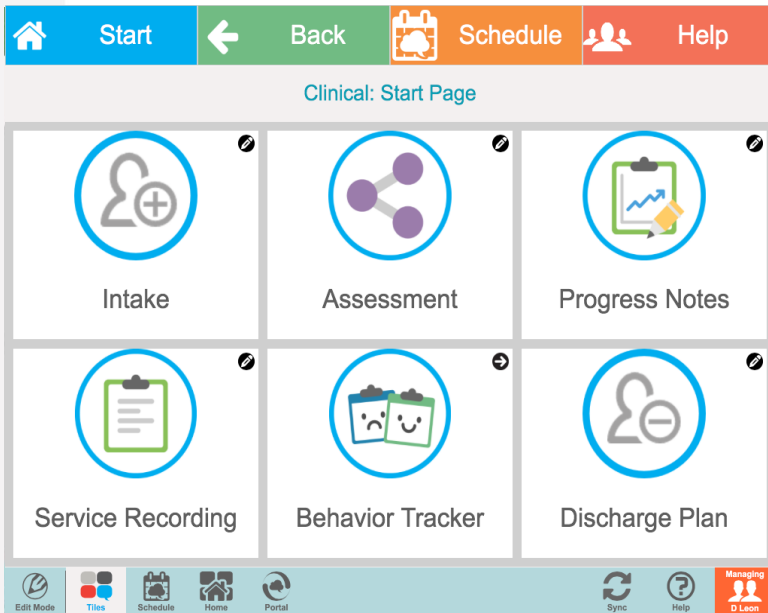

CONSUMER

- Home based kiosk / tablet with personalized content
- Aggregated monitoring through sensor and devices
- Secure communication with care team
- Over 40 different languages

CARE TEAM / FAMILY

- Remote monitoring with alerts and notifications
- Remote therapy and care planning
- Send schedules, reminders and content updates
- Mozzaz Portal for collaboration

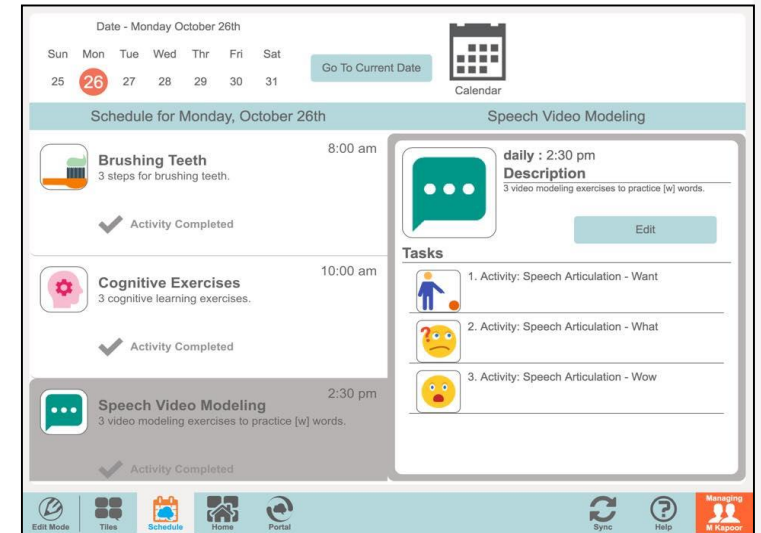

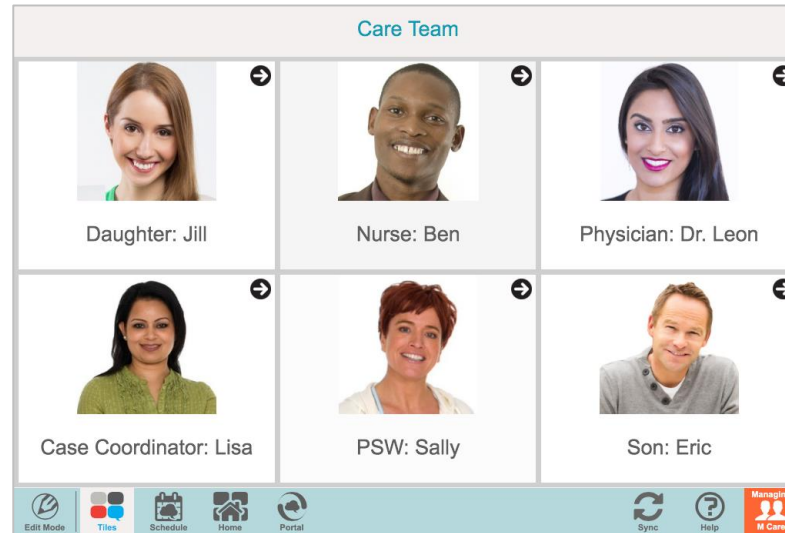

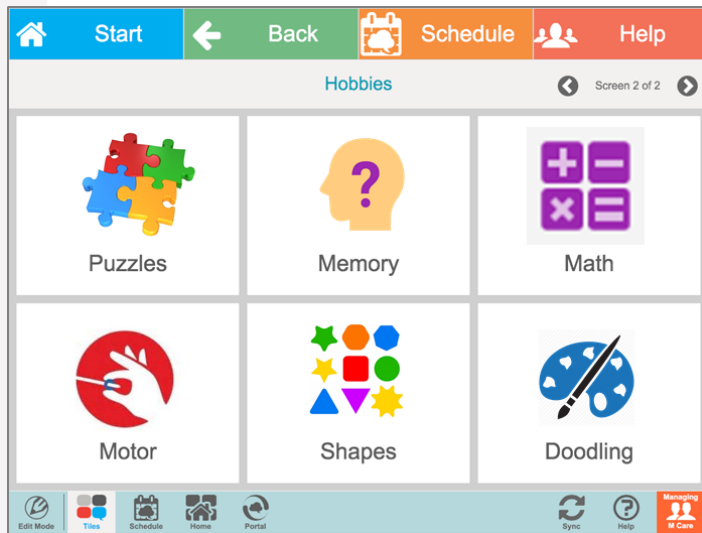

Mobile Tools for Staff Worker

Mobile Staff Workers

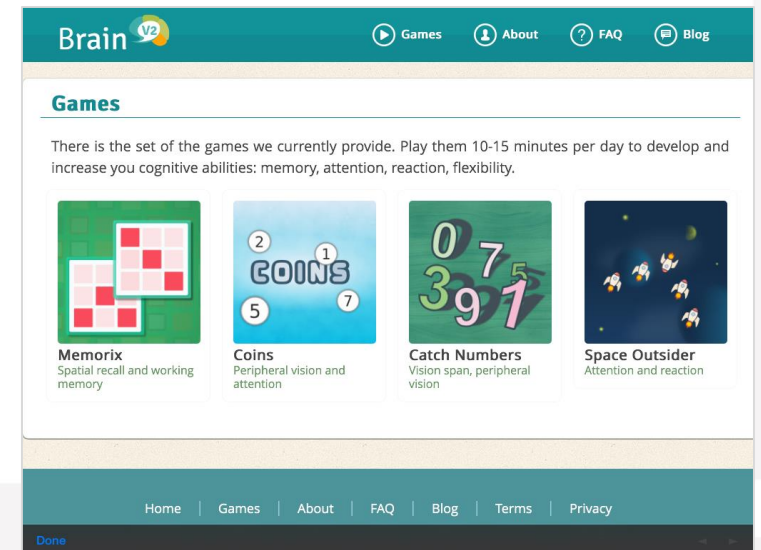

- Support for disconnected support – does not need an Internet connection
- Mobile assessments, service recordings and progress notes
- Signature captures - EVV support
- GPS tracking support

Care Scenario – Neurodegenerative Disabilities

Brain Activities and Memory Support

- Easy access content (large tiles, pictures, symbols)
- Personalized content to the consumer
- Content to support treatment and therapy programming (music, reminiscent therapy etc.)
- Visual schedules and reminders (ie. Activities for Daily Living)

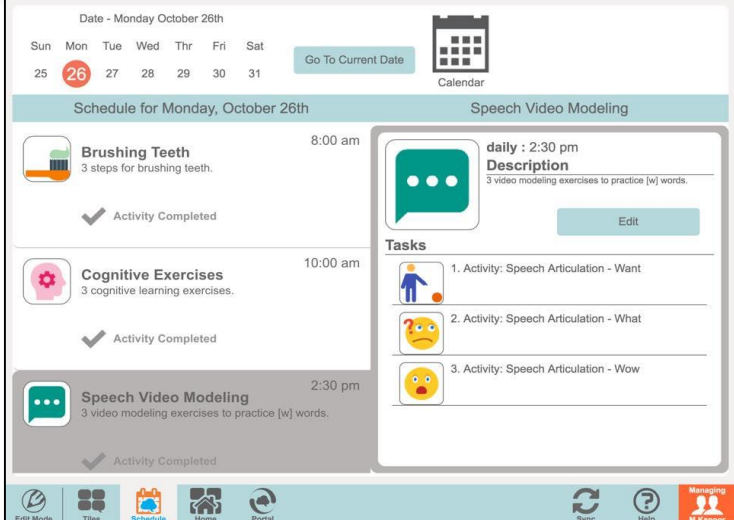

Care Scenario – Supported Employment

Case Study 1: TennCare SOS for I/DD

STATE OF TENNESSEE

Behavioral Health Crisis Prevention, Intervention and Stabilization Services:

Building "Systems of Support" (SOS) for Individuals with Intellectual or Developmental Disabilities (I/DD) who Experience Challenging Behavior

Mozzaz is being used by Project Transition for the State of Tennessee's IDD System of Support program for crisis stabilization for the State's super-utilizers. Mozzaz is used by the clinical team for remote case management and as intervention patient engagement tools for the clients.

Objectives:

- Reduce the number of crisis episodes by unique member
- Reduce the number of in-person crisis response episodes
- Decrease the number of unnecessary medication

Crisis Episodes: ↓ 60%

Community Participation: ↑ 6%

Proactive Crisis De-escalations: ↑ 23%

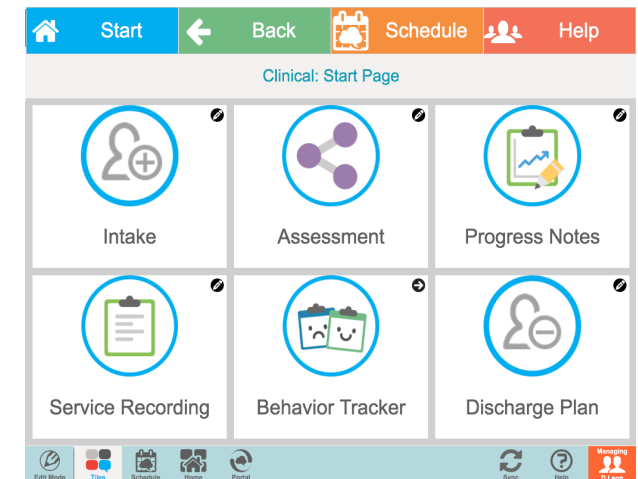

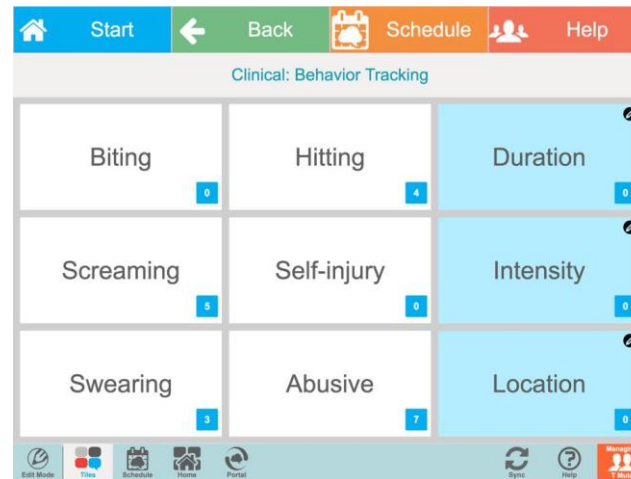

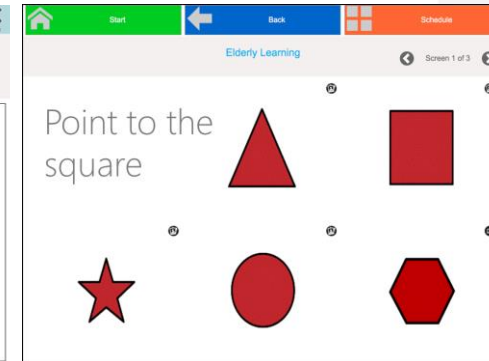

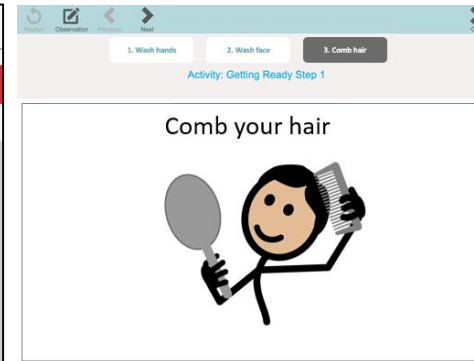

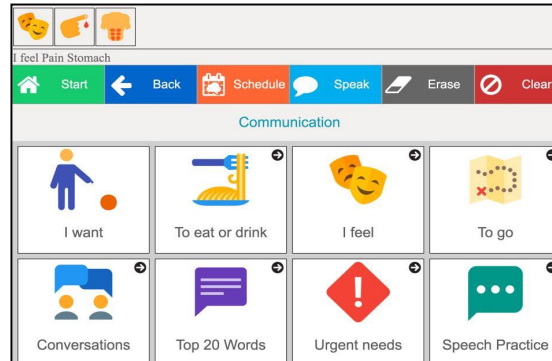

Case Study 2: I/DD Therapy Services

Mozzaz is being used with the Lindens Neurobehavioral Program for children and adolescents with acute behavioral challenges due to autism or IDD. The program involves one-on-one intensive behavior therapy to stabilize the client and prepare them to transition into less intense programs and broader community programming.

Objectives:

- Reduce the rate of maladaptive behavior episodes per client
- Reduce program readmissions
- Increase efficiencies in data collection and reporting
Save time in managing therapy content and material by making it less paper-intensive

Maladaptive Behavior: ↓ 45%

Program Readmissions: ↓ 65%

Staff Productivity ↑ 28%

Case Study 3: LTSS Employment Community First

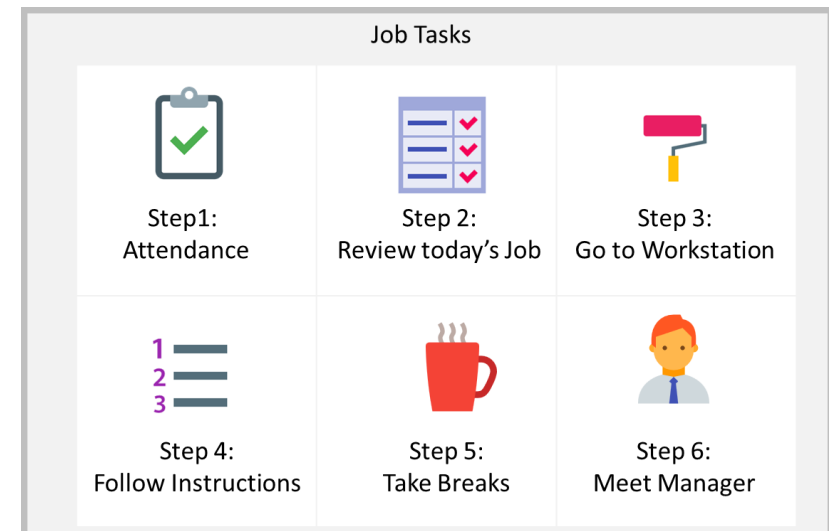

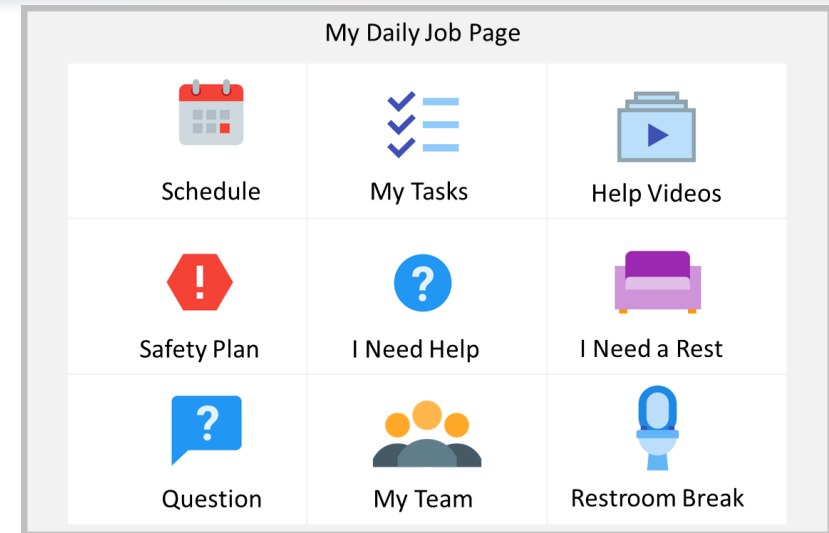

Objectives:

- Help individuals with I/DD live as independently as possible at home or in the community, not in an institution
- Provide the support integrate and build relationships in the community
- Provide family support to help the member with independence skills
- Help members get ready with employment and find a job

Mozzaz Solution:

- Enable care teams to provide individualized job and community support content
- Provide Augmentative Communication (AAC) support
- Provide care teams with the ability to collect data, observations and notes on member performance

HEDIS MEASUREMENT SCORES WILL BE ENABLED: TBD

Usage Patterns

USE CASE	SCENARIO	CUSTOMERS	Patient	Professional	Family	Case Manager
Digital Therapeutics	IDD, SMI, Geriatric Care	Bancroft, Vinfen, Anthem LTSS, Boswell	High	High	High	High
E-Coaching / Counselling / Patient Monitoring	Behavioral Health, SUD, Suicide, Mental Illness	Centerstone Suicide, Youth Villages, Ontario Shores, MAXIMUS	High	High	Low	High
Mobile Patient Management	EVV, Remote Care	TennCare SOS, Bancroft, CAMH	Low	High	Low	High
Treatment Support	Patient Education, Screening, Pre / Post Appointments, Chronic Illness	Youth Villages, MAXIMUS, Holland Bloorview	Med	High	Med	High
Patient Self-Help	Self-help resources, guidance, communication	City of Philadelphia	Med	Med	Low	Med

Adoption and usage patterns for the Mozzaz system vary across programs and users. The system is integrated into clinical workflows as part of the patient's care management and support program.

The following usage patterns are seen across the system:

- Usage patterns vary depending on the use case being supported
- Care teams include Mozzaz as part of the patient's care plan and expect patient's to follow it.
- Patient activity is remotely monitored to support adherence and track progress.
- Different users use different parts of Mozzaz in the program.

Thank You!
