
Medicaid & CHIP: July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report

September 27, 2016

Background

This monthly report on state Medicaid and Children’s Health Insurance Program (CHIP) data represents state Medicaid and CHIP agencies’ eligibility activity for the calendar month of July 2016. This report measures eligibility and enrollment activity for the entire Medicaid and CHIP programs in all states¹, reflecting activity for all populations receiving comprehensive Medicaid and CHIP benefits in all states, including states that have not yet chosen to adopt the new low-income adult group established by the Affordable Care Act.² This data is submitted to CMS by states using a common set of indicators designed to provide information to support program management and policy-making related to application, eligibility, and enrollment processes.³

As with previous reports, this month’s report focuses on those indicators that relate to the Medicaid and CHIP application and enrollment process:⁴

- The number of applications submitted directly to Medicaid and CHIP agencies, including those received through State-Based Marketplaces (SBMs);
- The number of eligibility determinations made by Medicaid and CHIP agencies on the applications described above, as well as applications to the Federally-Facilitated Marketplace (FFM) in states for which the FFM makes an eligibility assessment (and the state then completes the Medicaid or CHIP determination); and
- The total number of individuals enrolled in the Medicaid and CHIP programs who are receiving comprehensive benefits, including details on the total number of children enrolled in these programs.

¹ For purposes of this report, the term “states” include the 50 states and the District of Columbia.

² As of July 2016, thirty-two states had implemented the expansion of Medicaid under the Affordable Care Act to cover adults under age 65 with incomes up to 133 percent of the Federal Poverty Level. Louisiana implemented its new Medicaid expansion, Healthy Louisiana, on July 1, 2016. The enrollment impact of the Medicaid expansion varies; some states expanded coverage to parents and other adults at income levels above the level required under federal law before the Affordable Care Act. Many other states previously covered parents only at the minimum required income levels and often did not cover other adults without disabilities or adults without dependent children who are under age 65 at all.

³ See Appendix A for the standardized data definitions for the data included in this report. States continue to transition to these standardized definitions. State-specific notes on the differences between state-reported data and the data definitions are included in the tables in this report.

⁴ The Affordable Care Act’s “no wrong door” policy means that individuals can apply for health insurance coverage through the Marketplace or the Medicaid or CHIP agency (if a separate agency) in their state and receive an eligibility determination for the health insurance program for which they are eligible. Information on applications received by (and Medicaid and CHIP assessments and determinations made by) the Marketplaces during the Marketplace open enrollment period is included in the Health Insurance Marketplace’s 2016 Open Enrollment Period: Final Enrollment Report (March 11, 2016).

**Medicaid & CHIP
July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report**

As with each monthly report, given that states are reporting monthly data to CMS soon after the close of the month, the July 2016 data presented in this report should be considered preliminary. We have published updated data for June 2016 applications, eligibility determinations and enrollment on [Medicaid.gov](http://www.Medicaid.gov), which includes a more complete data set than the previously reported preliminary June 2016 data.

Medicaid and CHIP July 2016 Enrollment Data Highlights

Total Individuals Enrolled in Medicaid and CHIP in July 2016 in All States Reporting July Data (includes all individuals enrolled in the program on the last day of the reporting period)⁵	72,810,267 ⁶
Additional enrollment since October 2013 when the initial Marketplace open enrollment period began, among the 49 states reporting both July 2016 enrollment data and data from July-September of 2013⁷	15,393,550

- Over 72.8 million individuals were enrolled in Medicaid and CHIP in July 2016.⁸ This enrollment count is a point-in-time (on the last day of the month) and includes all enrollees in the Medicaid and CHIP programs who are receiving a comprehensive benefit package.
- 134,541 additional individuals were enrolled in July 2016 as compared to June 2016 in the 51 states that reported comparable June and July 2016 data.⁹
- Looking at the additional enrollment since October 2013 when the initial Marketplace open enrollment period began, among the 49 states reporting both July 2016 enrollment data and data from July-September of 2013, nearly 15.4 million additional individuals are enrolled in Medicaid and CHIP as of July 2016, a 27.3 percent increase over the average monthly enrollment

⁵ This enrollment data may differ from other published state and national enrollment figures because it only includes individuals with comprehensive benefits. Individuals who are only eligible for limited benefits under the Medicaid and CHIP programs (e.g., emergency Medicaid, family planning-only coverage, limited benefit dual eligible individuals, and Medicaid section 1115 demonstration populations with limited benefits) are excluded from this indicator in all reporting periods. See Appendix A for more information on this methodology. See the notes in Table 1 for state-specific caveats regarding the reported data. The enrollment measure is a total count of enrollment in Medicaid and CHIP, not solely a count of those newly enrolled during the reporting period.

⁶ The data contained in this report is preliminary because it is reported soon after the close of the reporting month and contains few, if any, individuals who become eligible in July 2016 after the close of the month due to retroactive eligibility under Medicaid or similar reasons. In Medicaid, individuals are potentially eligible for retroactive coverage for incurred health care costs dating back to 90 days prior to the date of application.

⁷ Connecticut and Maine did not submit enrollment data for the July-September 2013 baseline period.

⁸ See footnote 5 and 6.

⁹ See the notes in Table 1 for state-specific caveats regarding the reported data.

Medicaid & CHIP July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report

for July through September of 2013.¹⁰ (Connecticut and Maine are not included in this count because they did not submit enrollment data for the July-September 2013 baseline period.)

- Among states that had implemented the Medicaid expansion and were covering newly eligible adults in July 2016, Medicaid and CHIP enrollment rose by nearly 35.2 percent compared to the July-September 2013 baseline period, while states that have not, to date, expanded Medicaid reported an increase of over 12 percent over the same period.¹¹
- These enrollment counts are in addition to the enrollment increases from the nearly 950,000 individuals who gained coverage as a result of the Affordable Care Act before open enrollment began.¹² Seven states implemented an “early option” to expand Medicaid coverage to adults with incomes up to 133 percent of the Federal Poverty Line (FPL) between April 1, 2010 and January 1, 2014, using new state plan authority provided by the Affordable Care Act or a demonstration under section 1115 of the Social Security Act building upon that authority.¹³

As with previous reports, multiple factors contributed to the change in enrollment between July 2016 and the July-September 2013 baseline period, including but not limited to changes attributable to the

¹⁰ The net change in enrollment is based on data from the 49 states reporting both July 2016 enrollment data and data from July-September 2013 (the baseline period before the initial Marketplace open enrollment period) that contains comparable enrollment groups. These 49 states report total enrollment in July of nearly 71.8 million individuals, and July-September 2013 average enrollment of approximately 56.4 million. For July 2016, we are reporting growth of 15,393,550 compared to July-September 2013. This figure is greater than the 15,239,169 in net enrollment growth that was included in the *Medicaid and CHIP: June 2016 Applications, Eligibility Determinations, and Enrollment Report* by over 154,000. This difference does not match the 134,541 increase reported above for the June to July 2016 period because the 134,541 figure is based on 51 states, while the 154,000 figure is based on only 49 states. Please note, the July-September 2013 data may contain individuals with retroactive Medicaid coverage, and the July 2016 data included in this report is preliminary (see footnote 6), thus, the difference reported here between July 2016 and July-September 2013 period is likely understated.

¹¹ Percentage calculations are based only on states reporting in both July 2016 and the July through September 2013 baseline period. See footnote 9 for additional information. Among expansion states, the enrollment increases vary based on the size of the coverage expansions that occurred. States that previously offered comprehensive coverage to many adults with incomes under 133 percent of the FPL will likely see smaller increases than those who previously offered only coverage for very low-income parents. Additionally, in most states that provided Medicaid coverage to adults with incomes above 133 percent of the FPL prior to 2014, those individuals are no longer eligible for or enrolled in Medicaid and instead may be eligible to purchase qualified health plan coverage through the Marketplace, and may be eligible for the premium tax credit and cost-sharing reduction portion of the advance payments; this change will reduce the overall Medicaid enrollment in those states. Enrollment changes may also be impacted by other state specific policy and operational issues related to applications and renewals.

¹² Enrollment data for California, Colorado, the District of Columbia, Minnesota, and New Jersey was reported to CMS by the state and is from the end of 2013. Data for Connecticut and Washington is from 2012 (Source: Sommers, B. D., Arntson, E., Kenney, G. M., et al., “Lesson from Early Medicaid Expansions under Health Reform: Interviews with Medicaid Officials”, *Medicare & Medicaid Research Review*, 2013: Volume 3, number 4 (http://www.cms.gov/mmrr/Downloads/MMRR2013_003_04_a02.pdf).

¹³ Connecticut, the District of Columbia, Minnesota utilized state plan authority, while California, Colorado, New Jersey, and Washington provided the coverage through Medicaid demonstration authority under section 1115 of the Social Security Act. For more information about this “early option,” please see [Medicaid and CHIP: March 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report \(May 1, 2014\)](#).

Medicaid & CHIP July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report

Affordable Care Act. The enrollment numbers included in this report understate total Medicaid and CHIP enrollment because the data is preliminary. The preliminary data, which is submitted approximately a week after the close of the reporting period, generally does not include Medicaid and CHIP eligible individuals who applied in July and whose application will be fully processed after July 31st; these individuals will be enrolled effective back to at least the date of application or the first of the month and we note that those enrollments are not reflected in this preliminary data. Similarly, the preliminary data does not likely include individuals who had medical expenses in July 2016, applied for Medicaid in a later month, and qualify for retroactive Medicaid coverage in July 2016.¹⁴ Updated enrollment data for past months, which is updated one month after the close of the reporting period, is available on the Medicaid and CHIP Application, Eligibility Determination, and Enrollment Data page on Medicaid.gov.¹⁵

¹⁴ See footnote 6 for additional information on retroactive eligibility.

¹⁵ The updated data available on Medicaid.gov is not directly comparable to the preliminary data included in this report because it contains retroactive enrollment and individuals who applied during the reporting period but were determined eligible after the close of the reporting period.

**Medicaid & CHIP
July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report**

Child Enrollment

Total Medicaid child and CHIP enrollment in the 48 states reporting in July 2016¹⁶	35,374,863 ¹⁷
--	--------------------------

We are also reporting separately on the total number of individuals enrolled in CHIP and children enrolled in Medicaid for those states that are reporting the relevant data for each month in the six-month period between January and July 2016.¹⁸ This data appears in Table 2.¹⁹

- In the 48 states that reported relevant data for the month of July, almost 35.4 million individuals are enrolled in CHIP or are children enrolled in the Medicaid program. Similar to last month (June 2016), New Mexico reported child enrollment in July 2016; therefore, the child enrollment figures reported in the June and July 2016 reports are not comparable to the corresponding statistics in earlier reports where New Mexico did not report child enrollment data.
- In the 48 states that reported both July 2016 total Medicaid child and CHIP enrollment and total Medicaid and CHIP enrollment data, children enrolled in the Medicaid program and individuals enrolled in CHIP make up 51.1 percent of total Medicaid and CHIP program enrollment.

It is important to note that all states had already expanded coverage for children in Medicaid and/or CHIP prior to implementation of the Affordable Care Act, although states have continued to expand coverage since then.²⁰

¹⁶ This figure includes children enrolled in the Medicaid program and the total enrollment for separate CHIP programs, which is composed mostly of children. However, several states also cover pregnant women through CHIP. As a result, some adults are included in this figure. This figure was calculated for any state that reported data on Medicaid child enrollment through the performance indicator process, subject to CMS quality review of the data. States use the definition of "child" as included in the state's Medicaid or CHIP state plan in reporting performance indicator data to CMS, which varies from state to state. Individuals who are only eligible for limited benefits under the Medicaid and CHIP programs (e.g., emergency Medicaid, family planning-only coverage, limited benefit dual eligible individuals, and Medicaid 1115 demonstration populations with limited benefits) are excluded from this indicator in all reporting periods. Arizona, the District of Columbia, and Tennessee did not submit child enrollment data for July 2016.

¹⁷ See the notes in Table 2 for state-specific caveats.

¹⁸ In Table 2, the reported July 2016 child enrollment figure appears to be larger than the total enrollment figures from February through May 2016 because only 47 states submitted child enrollment data in these earlier months, as compared to the 48 in June and July 2016. Also, please note, the prior month's total child enrollment figure includes data that is reported more than a month after the close of the reporting period, and thus includes some children enrolled retroactively. The preliminary July 2016 data included in this report is collected in the month after the reporting period and includes very few (if any) children enrolled retroactively. An updated July figure that includes more retroactively enrolled individuals will be included in the next report in this series.

¹⁹ Children are included in the total number of individuals enrolled in Medicaid and CHIP in July 2016, as reported on page 2 and in Table 1. Total enrollment data for January 2014 through June 2016 is available on Medicaid.gov.

²⁰ Four million more children were covered by Medicaid or CHIP in 2012, compared with 2008. Kenneth Finegold and Sophia Koontz, *ASPE Issue Brief: Children's Health Coverage on the 5th Anniversary of CHIPRA*, February 4, 2014, http://aspe.hhs.gov/health/reports/2014/CHIPRA_5thAnniversary/ib_CHIPRA5thanniversary.pdf

**Medicaid & CHIP
July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report**

Medicaid and CHIP July 2016 Application and Eligibility Data Highlights

	July 2016 Monthly in All States Reporting
<i>Applications</i>	
Applications for Financial Assistance Initially Received by State Medicaid and CHIP Agencies (note that more than one individual may be included on an application and some states have included renewals and account transfers from the FFM)	1,514,261 ²¹
Applications for Financial Assistance Initially Received by State-Based Marketplaces (note that more than one individual may be included on an application)	806,734 ²²
<i>Eligibility Determinations</i>	
Individuals Determined Eligible for Medicaid and CHIP by State Agencies at Application (includes those newly eligible under the Affordable Care Act and those eligible under prior law)	1,311,289 ²³

During the month of July 2016, more than 2.3 million applications for coverage and financial assistance (including Medicaid and CHIP coverage, tax credits and subsidies) were submitted at the state level (including over 1.5 million received directly by state Medicaid and CHIP agencies and more than 800,000 received by SBMs).²⁴ Table 3 includes a comparison of the total applications for financial assistance to state agencies (including applications for Medicaid, CHIP, and financial assistance in the Marketplace in SBM states) in July 2016 as compared to the prior month (June 2016). Note that these application numbers do not include applications received at the FFM and subsequently transferred to state Medicaid or CHIP agencies (see State-by-State Table notes for exceptions).²⁵

²¹ See the notes in Table 3 for state-specific caveats regarding the reported data; because of reporting capability, some states included some renewals, applications to SBMs, or transfers from the FFM in the data.

²² See the notes in Table 3 for state-specific caveats regarding the reported data; because of reporting capability, some states reported renewals in the data and included applications received by their SBMs in their Medicaid and CHIP agency application data instead of reporting these applications separately. Note that California did not report SBM application data this month.

²³ See the notes in Table 3 for state-specific caveats regarding the reported data; because of reporting capability, some states reported some individuals determined eligible at renewal in the data. Tennessee only provided determination data on their CHIP program.

²⁴ The following states have included renewals in their July 2016 application data: Alaska, the District of Columbia, Nevada, New York, Ohio, Pennsylvania, and Virginia. South Dakota and Utah included transfers from the FFM in its July 2016 application data.

²⁵ See footnote 21.

Medicaid & CHIP July 2016 Monthly Applications, Eligibility Determinations and Enrollment Report

States reported making over 1.3 million eligibility determinations for Medicaid and CHIP in July 2016 for individuals applying for coverage. As described above and in prior reports, this figure includes all of state Medicaid and CHIP agencies' determinations for individuals eligible under prior law, as well as through coverage expansions under the Affordable Care Act; note that, due to limitations on the data some states are able to report, the number of determinations includes renewals in those states.²⁶ Additionally, the determination number does not represent unique individuals, as an individual may have more than one eligibility determination. It is important to keep in mind that differences in volume of administrative transfers and other types of one-time enrollment activities can affect month-to-month comparisons of eligibility data.²⁷

See the Medicaid and CHIP Application, Eligibility Determination, and Enrollment Data page on Medicaid.gov for preliminary and updated data on applications and determinations for October 2013 through June 2016.

Data Limitations

CMS established a common set of definitions for consistency in reporting the Medicaid and CHIP performance indicators; these definitions appear in Appendix A. States are at various points in the process of transitioning from their historic definitions to the updated standardized reporting specifications. Where states have provided data that vary from our specifications, we have included that information in notes in the State-by-State tables.

State-by-State Tables

Below are 3 tables with state-specific data. The first table contains data on the total number of people enrolled in state Medicaid and CHIP programs in July 2016. The second table contains data on children enrolled in state Medicaid and CHIP programs in July 2016. The third table contains data on Medicaid and CHIP applications and eligibility determinations for the month of July 2016. The description of each data element included in the table is available in Appendix A. Unless otherwise noted, the reporting period for all elements is July 1 – 31, 2016.

²⁶ The states that have included renewals in their July 2016 determination data are: District of Columbia, Iowa, Michigan, Nevada, Pennsylvania, Vermont and Virginia. Some of these renewals are conducted without the individual submitting a new application, using information already in the state's system that the individual is asked to verify.

²⁷ A number of states are employing a new tool for facilitating Medicaid enrollment to conduct an "administrative transfer" to Medicaid using income information from the Supplemental Nutritional Assistance Program (SNAP) or the CHIP program (for the parents of CHIP enrollees). The following states have implemented administrative transfers since this authority was made available: Arkansas, California, Illinois, New Jersey, Oregon, and West Virginia. No states reported conducting administrative transfers in July 2016. As of the end of April 2015, 726,597 individuals have been determined eligible for Medicaid or CHIP as a result of this transitional strategy in the six states that have implemented it and reported appropriate data. Michigan received approval to conduct administrative transfers but it has not implemented this targeted enrollment strategy.

Table 1: Medicaid and CHIP: June and July 2016 Preliminary Monthly Enrollment

^=Louisiana's effective date for implementing the expansion was July 1, 2016.

**= The state's Marketplace uses the FFM's information technology platform for eligibility and enrollment functions (the FFM makes either assessments or determinations of Medicaid and CHIP eligibility).

(-)=state has not reported data except as noted below.

Partnership, Plan Management, FFM/SBM-SHOP are all types of FFM's.

Column III is calculated for only those states that reported both June and July 2016 data.

Columns V and VI are calculated for only those states that reported data from both July 2016 and the July-Sept. 2013 period.

The subtotals for states reporting data from both July 2016 and the July-Sept. 2013 period exclude CT.

Arkansas	(I), (II)	Includes Private Option enrollees.
California	(I), (II)	Includes individuals transferred from the Low Income Health Program
California		section 1115 demonstration.
California	(IV)	Includes approximately 650,000 individuals transferred from the Low Income
California		Health Program section 1115 demonstration.
District of Columbia	(I), (II), (IV)	Includes limited benefit dual eligible individuals and individuals enrolled in the locally funded DC Health Alliance.
Illinois	(IV)	Includes individuals who received retroactive coverage (unlike columns (I) and (II)).
Indiana	(I), (II), (IV)	Includes partial benefit dual eligible individuals.
Minnesota	(IV)	May include duplicates (unlike columns (I) and (II)).
New Jersey	(I), (II), (IV)	Includes individuals eligible at any point in the month.
New York	(I), (II)	Includes estimated retroactive enrollment.
North Dakota	(IV)	Data is from July 2013 only.
Oregon	(IV)	Includes emergency Medicaid population.

Table 1: Medicaid and CHIP: June and July 2016 Preliminary Monthly Enrollment

(-)=state has not reported data except as noted below.

Partnership, Plan Management, FFM/SBM-SHOP are all types of FFM.

Column III is calculated for only those states that reported both June and July 2016 data.

Columns V and VI are calculated for only those states that reported data from both July 2016 and the July-Sept. 2013 period.

The subtotals for states reporting data from both July 2016 and the July-Sept. 2013 period exclude ME.

Alabama	(IV)	Data is from September 2013 only.
Florida	(I), (II)	Does not include SSI recipients enrolled in Medicaid.
Utah	(I), (II), (IV)	Includes service limited Medicare program beneficiaries (SLMBs).
Wisconsin	(IV)	Does not include retroactive enrollment.

Table 1: Medicaid and CHIP: June and July 2016 Preliminary Monthly Enrollment

Total Enrollment						
All States	Total Medicaid and CHIP Enrollment, June 2016 (Preliminary) (I)	Total Medicaid and CHIP Enrollment, July 2016 (Preliminary) (II)	% Change June to July 2016 (Columns (I) and (II)) (III)	Average Monthly Medicaid and CHIP Enrollment, July-Sept. 2013 (IV)	Net Change, July-Sept. 2013 to July 2016 (Columns (IV) and (II)) (V)	% Change, July-Sept. 2013 to July 2016 (Columns (IV) and (II)) (VI)
Total Across All States	72,675,726	72,810,267	0.19%	56,392,477	15,393,550	27.30%
Total for States that Reported in June and July 2016	72,675,726	72,810,267	2016 134,541			
Total for States that Reported in July 2016 and July-Sept. 2013		71,786,027		56,392,477	Difference July-Sept 2013 to July 2016 15,393,550	

Column III is calculated for only those states that reported both June and July 2016 data.

Columns V and VI are calculated for only those states that reported data from both June 2016 and the July-Sept. 2013 period.

Totals for states reporting data from both June 2016 and the July-Sept. 2013 period exclude CT and ME.

Table 2: Medicaid and CHIP: July 2016 Preliminary Monthly Medicaid and CHIP Child Enrollment

For general notes on enrollment data, see Table 1: Medicaid and CHIP: June and July 2016 Preliminary Monthly Enrollment.

(-)=State has not reported data or data submitted was incomplete.

States that provide coverage to pregnant women through CHIP and whose child enrollment figures include pregnant women are NJ, RI, CO, AR, CA, LA, MA, MI, MN, NE, OK, OR, TN, VA, WA, WI.

Column VIII is calculated for only those states that reported both July 2016 child enrollment data and July 2016 Total Medicaid and CHIP enrollment data .

New York	(I) - (VII)	Includes estimated retroactive enrollment.
West Virginia	(I) - (III)	Excludes foster care children.

Subtotal for States Expanding Medicaid that Reported in June and July 2016				1,637,750	1,540,572	July 2016 97,178			

^=Louisiana's effective date for implementing the expansion is July 1, 2016.

**= The state's Marketplace uses the FFM's information technology platform for eligibility and enrollment functions (the FFM makes either assessments or determinations of Medicaid and CHIP eligibility).

(-)=state has not reported data except as noted below.

Column V is calculated for only those states that reported June and July 2016 Applications data (subtotals exclude AR, AZ, KY).

Partnership, Plan Management, FFM/SBM-SHOP are all types of FFMs.

† Reported value is less than 10, excluded from data set to ensure privacy.

Table 3: Medicaid and CHIP: July 2016 Monthly Applications and Eligibility Determinations

Alaska	(I), (III), (IV)	Includes renewals converting to MAGI methodology.
Alaska	(VI), (VIII)	Includes CHIP.
California	(I),(IV)	Reflects primarily newly-determined and likely eligible Medicaid applicants, as well as some ongoing caseload activity conducted via the state's health exchange automation system.
California	(I), (III), (IV)	Does not include data from all consortia.
California	(VI)	Reflects primarily newly-determined and likely eligible Medicaid applicants as well as some ongoing caseload activity conducted via the state's health exchange automation system.
California	(VI), (VII), (VIII)	Does not include all eligibility determinations.
Colorado	(I)	State Medicaid agency hosts SBM portal; number includes all applications for insurance affordability programs.
Connecticut	(I), (III), (IV)	Data may include some duplication of applications between Medicaid and CHIP.
Connecticut	(II)	Data may contain duplicate applications, and may include some change in circumstance updates that are not new applications for coverage.
Connecticut	(VI)	Count is of households, not individuals.
District of Columbia	(I)	Includes SBM data.
District of Columbia	(III), (IV)	Includes renewals.
District of Columbia	(VI)	Includes all determinations (e.g., renewals); includes CHIP.
Hawaii	(I)	Number includes all applications for insurance affordability programs.
Iowa	(VI)	Does not include MAGI determinations.
Iowa	(VI), (VII), (VIII)	Data are incomplete; does not include all determinations.
Iowa	(VI), (VII)	Includes renewals.
Maryland	(VI), (VII), (VIII)	Count is of households, not individuals. Includes State Medicaid Agency data and SBM data from 7/1 - 7/31.
Michigan	(VI)	Does not include MAGI determinations.
Michigan	(VI)	Includes renewals.
Minnesota	(VI)	Includes CHIP.
Nevada	(I), (III), (IV)	Includes renewals.
Nevada	(VI)	Count is of households, not individuals. Includes renewals.
New Jersey	(I), (III), (IV)	Includes applications received at county welfare agencies.
New Jersey	(VI), (VII), (VIII)	Does not include all eligibility determinations; county welfare agencies determinations are not included in this data.
New York	(III), (VI)	Includes renewals.
Ohio	(I), (III), (IV)	Includes renewals. May include some applications only for other benefits, not for Medicaid and CHIP.
Oregon	(VI)	Count is of households, not individuals.
Oregon	(VI), (VIII)	Includes MAGI populations only.
Pennsylvania	(I), (III), (IV)	Includes renewals.
Pennsylvania	(VI), (VIII)	Includes renewals.
Rhode Island	(VI), (VII)	Includes only determinations through new MAGI system.
Vermont	(VI)	Includes renewals.

Table 3: Medicaid and CHIP: July 2016 Monthly Applications and Eligibility Determinations

States Not Expanding Medicaid	Marketplace Type	Applications					Determinations		
		New Applications Submitted to Medicaid and CHIP Agencies, July 2016 (Preliminary) (I)	Applications for Financial Assistance Submitted to the State Based Marketplace, July 2016 (Preliminary) (II)	Total Applications for Financial Assistance Submitted at State Level, July 2016 (Preliminary) (III)	Total Applications for Financial Assistance Submitted at State Level, June 2016 (Preliminary) (IV)	% Change June to July 2016 (Columns (IV) and (III)) (V)	Individuals Determined Eligible for Medicaid at Application, July 2016 (Preliminary) (VI)	Individuals Determined Eligible for CHIP at Application, July 2016 (Preliminary) (VII)	Total New Determinations, July 2016 (Preliminary) (VIII)

Table 3: Medicaid and CHIP: July 2016 Monthly Applications and Eligibility Determinations

(-)=state has not reported data except as noted below.

Column V is calculated for only those states that reported June and July 2016 Applications data (subtotals exclude KS; totals exclude AR, AZ, KS, KY).

Partnership, Plan Management, FFM/SBM-SHOP are all types of FFM.

Percent change figures in the subtotal of column V exclude TN, which only reports CHIP data.

† Reported value is less than 10, excluded from data set to ensure privacy.

Florida	(I), (III), (IV)	Includes account transfers from the FFM assessed for CHIP.
South Dakota	(I), (III), (IV)	Includes account transfers from the FFM.
South Dakota	(VI)	Includes CHIP.
Tennessee	(I), (III)	Includes only unborn CHIP children.
Tennessee	(IV)	Data are from CHIP agency only. Medicaid reporting capability in development.
Tennessee	(VII), (VIII)	Includes only unborn CHIP children.
Tennessee	(VI)	Excluded because data is only from CHIP agency.
Utah	(I), (III), (IV)	Includes applications for non-health coverage programs.
Utah	(I), (III), (IV)	Includes account transfers from the FFM.
Virginia	(I), (III), (IV)	Includes renewals.
Virginia	(VI), (VII)	Includes renewals.
Wisconsin	(VI), (VII)	Count is of unique individuals receiving determinations, not unique determinations.
Wyoming	(I), (III), (IV)	Does not include applications received online.

APPENDIX A: Description of Data Elements in Tables

Table 1: Medicaid and CHIP: June and July 2016 Preliminary Monthly Enrollment

Total Medicaid and CHIP Enrollment, June 2016 (Preliminary) (I)

Total Medicaid and CHIP Enrollment, July 2016 (Preliminary) (II)

The total unduplicated number of individuals enrolled in Medicaid and CHIP as of the last day of the reporting period, including those with retroactive, conditional, and presumptive eligibility. This indicator is a point-in-time count of total program enrollment, and is not solely a count of those newly enrolled during the reporting period. This number includes only those individuals who are eligible for comprehensive benefits (e.g., emergency Medicaid, family planning-only coverage and limited benefit dual eligible individuals are excluded). Individuals eligible under demonstration projects authorized by section 1115 of the Social Security Act are included as long as the benefits and networks are comprehensive. CHIP children subject to a waiting period or premium lock-out period are considered eligible but not enrolled and are not included. The July 2016 data was submitted in August and is considered preliminary.²⁸ The June 2016 data in this table was submitted in July and is also preliminary. June data that was updated in August (which may include more individuals with retroactive eligibility) is posted separately on Medicaid.gov. Other reporting on Medicaid and CHIP enrollment by states and researchers often may include some beneficiaries excluded in this data (because comprehensive coverage is not provided), or otherwise use a different methodology.

Percent Change June 2016 to July 2016 (III)

The percentage change in **Total Medicaid and CHIP Enrollment, July 2016 (Preliminary) (II)** as compared to **Total Medicaid and CHIP Enrollment, June 2016 (Preliminary) (I)** is calculated for states that provided data for both periods. In cases where there is a negative percentage change, this may be due to a number of factors. Changes in enrollment levels are driven by the number of newly enrolled individuals as well as by the number of individuals whose coverage has terminated.

Average Monthly Medicaid and CHIP Enrollment, July-Sept. 2013 (IV)

The average number of individuals enrolled in Medicaid and CHIP for each month during the July-September 2013 period using an average of enrollment numbers submitted by the states for each month in this period. Not all states submitted three months of data; the average is calculated using any months of baseline data that were provided. The unit of measurement is individuals enrolled as of the last day of the reporting period (month). This baseline data includes more retroactive enrollments than the July 2016 data, which makes change between the baseline data and the July preliminary data look smaller than it would be if retroactive

²⁸ In Medicaid, individuals are potentially eligible for retroactive eligibility to cover incurred health care costs for up to 90 days prior to the date of application. Under the Performance Indicator process, states initially submit their monthly enrollment data just a week after the month closes, and then update their data one month later. Therefore, the Performance Indicator enrollment counts will always be slightly understated, as they will not include all individuals granted retroactive eligibility.

enrollments were excluded from the data for the July-September 2013 period.²⁹ Such exclusions were not possible.

Net Change, July-Sept. 2013 to July 2016 (V)

The net change in **Total Medicaid and CHIP Enrollment, July 2016 (preliminary) (II)** as compared to **Average Monthly Medicaid and CHIP Enrollment, July-Sept. 2013 (IV)** is calculated for states that provided data for both periods and represents the difference in enrollment between these two periods. A negative net change may be due to a number of factors, including the preliminary nature of the monthly data (as described above) as compared to the finalized nature of the baseline data. Changes in enrollment levels are driven by the number of newly enrolled individuals as well as by the number of individuals whose coverage has terminated.

Percentage Change, July-Sept. 2013 to July 2016 (VI)

The percentage change in **Total Medicaid and CHIP Enrollment, July 2016 (Preliminary) (II)**, compared to **Average Monthly Medicaid and CHIP Enrollment, July-Sept. 2013 (IV)**, is calculated for states that provided data for both periods. A negative percentage change may be due to a number of factors, including the preliminary nature of the monthly data (as described above) as compared to the finalized nature of the baseline data. Changes in enrollment levels are driven by the number of newly enrolled individuals as well as by the number of individuals whose coverage has terminated.

Note: Updated enrollment data for January 2014 through June 2016 is available on the Medicaid and CHIP Application, Eligibility Determination, and Enrollment Data page on Medicaid.gov. This data is updated more than 30 days after the close of the reporting period, to account for retroactive Medicaid eligibility and other updates to the preliminary data provided soon after the close of the reporting period, which forms the basis for this report.

Table 2: Medicaid and CHIP: July 2016 Preliminary Monthly Medicaid Child and CHIP Enrollment

Medicaid Child and CHIP Enrollment, February - June 2016 ((I)-(V))

As of the last day of the calendar month—

- The total unduplicated number of individuals enrolled in CHIP (i.e. funded under title XXI of the Social Security Act); plus
- The total unduplicated number of individuals enrolled in Medicaid (i.e. funded under title XIX of the Social Security Act) who are children.

States use the definition of "child" as included in the state's Medicaid or CHIP state plan. This definition may vary from state to state. A few states cover pregnant women through CHIP, which means this figure may include some adults.³⁰ These figures may have been updated by

²⁹ See footnote 28.

³⁰ The states which provide complete coverage to pregnant women through CHIP are New Jersey, Rhode Island, and Colorado. In addition, the following states provide certain services to pregnant women through CHIP: Arkansas, California, Louisiana, Massachusetts, Michigan, Minnesota, Nebraska, Oklahoma, Oregon, Rhode Island, Tennessee, Texas, Virginia, Washington, and Wisconsin. Benefits offered vary by state.

states more than 30 days after the close to the reporting period to include enrollees with retroactive coverage and other updates.

Medicaid Child and CHIP Enrollment, July 2016 (Preliminary) (VI)

As of the last day of the calendar month—

- The total unduplicated number of individuals enrolled in CHIP (i.e. funded under title XXI of the Social Security Act); plus
- The total unduplicated number of individuals enrolled in Medicaid (i.e. funded under title XIX of the Social Security Act) who are children.

States use the definition of "child" as included in the state's Medicaid or CHIP state plan. This definition may vary from state to state. A few states cover pregnant women through CHIP, which means this figure may include some adults.³¹ The July 2016 data was submitted in August and is considered preliminary.³²

Total Medicaid and CHIP Enrollment, July 2016 (Preliminary) (VII)

The total unduplicated number of individuals enrolled in Medicaid and CHIP as of the last day of the reporting period, including those with retroactive, conditional, and presumptive eligibility. This indicator is a point-in-time count of total program enrollment, and is not solely a count of those newly enrolled during the reporting period. This number includes only those individuals who are eligible for comprehensive benefits (e.g., emergency Medicaid, family planning-only coverage and limited benefit dual eligible individuals are excluded). Individuals eligible under demonstration projects authorized by section 1115 of the Social Security Act are included as long as the benefits and networks are comprehensive. CHIP children subject to a waiting period or premium lock-out period are considered eligible but not enrolled and are not included. The July 2016 data was submitted in August and is considered preliminary.³³ This data is the same as the data reported in column (II) in Table 1: Medicaid and CHIP: June 2016 and July 2016 Preliminary Monthly Enrollment.

Medicaid and CHIP Child Enrollment as a % of Total Enrollment (VIII)

Medicaid and CHIP Child Enrollment, July 2016 (Preliminary) (VI) as a percentage of Total Medicaid and CHIP Enrollment, July 2016 (Preliminary) (VII).

³¹ See footnote 30.

³² See footnote 28.

³³ See footnote 28.

Table 3: Medicaid and CHIP: July 2016 Monthly Applications and Eligibility Determinations

Application Data Elements

New Applications Submitted to Medicaid and CHIP Agencies, July 2016 (Preliminary) (I)

Number of applications received by the Medicaid agency, a separate CHIP agency (if one exists in the state), or both during the reporting period. Includes applications received online, via mail, in person or phone. Does not include applications submitted to a State-Based Marketplace (SBM) or the Federally-Facilitated Marketplace (FFM) (the SBM number is reported in column IV).³⁴ It should be noted that data reflected in this performance indicator are not a count of individuals, as more than one person may be included on a single application. As states are transitioning to new systems, they may not be able to report applications received across all aspects of their programs or systems. See the state-specific notes in the table for further information about state limitations in this area.³⁵ The July 2016 data was submitted in August and is considered preliminary.³⁶

Applications for Financial Assistance Submitted to the State-Based Marketplace, July 2016 (Preliminary) (II)

This element is the number of applications requesting financial assistance (Medicaid, CHIP or the Advanced Premium Tax Credit and Cost-Sharing Reductions) that have been received by the SBM during the reporting period. The July 2016 data was submitted in August and is considered preliminary.³⁷

Total Applications for Financial Assistance Submitted at the State Level, July 2016 (Preliminary) (III)

Total Applications for Financial Assistance Submitted at the State Level, June 2016 (Preliminary) (IV)

For states with an SBM, the data reflects the total of **Applications Submitted to Medicaid and CHIP Agencies, July 2016 (Preliminary)** plus **Applications for Financial Assistance Submitted to the State-Based Marketplace, July 2016 (Preliminary)**. For FFM states, the data reflects **Applications Submitted to Medicaid and CHIP Agencies, July 2016 (Preliminary)**. For SBM states, the data includes all applications for financial assistance; individuals on these applications will be determined eligible for Medicaid, CHIP or Advanced Premium Tax Credits and Cost-Sharing Reductions, or determined ineligible for financial assistance. The July 2016 data was submitted in August and is considered preliminary. The June 2016 data in this table was submitted in July and is also preliminary. June data that was updated in August (which may include additional individuals who applied in June, but who were not captured in the preliminary data) is posted separately on Medicaid.gov.

³⁴ As described in the state-specific notes in the tables, some states included account transfers from the FFM in the total count of applications received by Medicaid and CHIP agencies.

³⁵ As described in the state-specific notes in the tables, some states included renewals in the total count of applications received by Medicaid and CHIP agencies.

³⁶ See footnote 28.

³⁷ See footnote 28.

Percentage Change June 2016 to July 2016 (V)

The percentage change in **Total Applications for Financial Assistance Submitted at the State Level, July 2016 (Preliminary) (III)** as compared to **Total Preliminary Applications Submitted at the State Level, June 2016 (Preliminary) (IV)** is calculated for states that provided data for both periods.

Eligibility Determination Data Elements

Individuals Determined Eligible for Medicaid at Application, July 2016 (VI)

Total number of individuals determined eligible for Medicaid (under title XIX of the Social Security Act) during the reporting period based on applications for coverage submitted to any state agency (Medicaid, CHIP or the SBM) or based on an administrative determination authorized under a targeted enrollment strategy approved by CMS.³⁸ The unit of measurement is a count of individuals (as compared to the application numbers, which may include multiple people in one application). This number includes all determinations on applications made within the reporting period—some of those determinations are on applications reported in the **Applications** data, and some are on applications received prior to the reporting period. This does not include determinations made at a periodic redetermination or because of a change in circumstance for a current beneficiary.³⁹ The unit of measurement is people with determinations completed; this is not an unduplicated number of unique individuals because an individual may have more than one determination within the reporting period. Individuals are first determined based on modified adjusted gross income (MAGI), and if needed, may request a subsequent determination based on non-MAGI factors. A list of which eligibility groups are MAGI and which are non-MAGI is available on [Medicaid.gov](http://www.Medicaid.gov).

As states are transitioning to their new systems, they may not be able to report determinations being made across all aspects of their programs or systems (i.e., the legacy systems they are winding down and the new eligibility systems they are implementing). See the notes in the table for further information about state limitations in this area.

In states receiving account transfers from the FFM in July where the FFM makes an eligibility assessment (and the state then completes the Medicaid determination), this number includes determinations made on accounts assessed as eligible and transferred from the FFM. In other states, where the state has delegated to the FFM the authority to make Medicaid eligibility determinations, the report does not include the FFM determinations, because the Medicaid/CHIP agency is not performing the determinations, and instead is accepting the account transfer and proceeding with enrollment steps. Individuals determined eligible by the FFM are included in the Total Enrolled indicators. For more information about the assessment and determination models in FFM states see [Medicaid.gov](http://www.Medicaid.gov).

³⁸ Information on targeted enrollment strategies and the states approved for these strategies is available here: <http://www.Medicaid.gov/Medicaid-chip-program-information/program-information/targeted-enrollment-strategies/targeted-enrollment-strategies.html>.

³⁹ As described in the state-specific notes in the tables, some states could not provide data that met our specifications. Notes are provided in cases where the state included renewals in this data element.

Individuals Determined Eligible for CHIP at Application, July 2016 (VII)

Total number of individuals determined eligible for CHIP (under title XXI of the Social Security Act) during the reporting period that follows the applicant submitting an application for coverage to any state agency (Medicaid, CHIP, or the SBM). This number includes all determinations at application made within the reporting period—some of those determinations are on applications reported in the **Applications** data, and some are on applications received prior to the reporting period. As states are transitioning to their new systems, they may not be able to report determinations being made across all aspects of their programs or systems (i.e., the legacy systems they are winding down and the new eligibility systems they are implementing). See the footnotes in the table for further information about state limitations in this area. The unit of measurement is people with determinations completed; this is not an unduplicated number of unique individuals.

In states receiving account transfers from the FFM in July where the FFM makes an eligibility assessment (and the state then completes the CHIP determination), this number includes determinations made on accounts assessed as eligible and transferred from the FFM. In other states, where the state has delegated to the FFM the authority to make a CHIP eligibility determination, the report does not include the FFM determinations, because the Medicaid/CHIP agency is not performing a determination, and instead is accepting the account transfer and proceeding with enrollment steps. Individuals determined eligible by the FFM are included in the Total Enrolled indicators. For more information about the assessment and determination models in FFM states see Medicaid.gov.

Total New Determinations, July 2016 (VIII)

The total of **Individuals Determined Eligible for Medicaid at Application** plus **Individuals Determined Eligible for CHIP at Application**.

A Note about Federally-Facilitated Marketplace Types: For the purposes of the report, we refer to State Partnership Marketplaces (Partnership), States performing Plan Management functions (Plan Management), and the State-Based Small Business Health Options Program (SB-SHOP) as Federally-Facilitated Marketplaces (FFMs). The state-by-state tables contain information on the specific marketplace type for each state.
