

# eLTSS Connect-a-Thon

- **Division of Developmental Disabilities (DD) successfully recruited partners for participation in the eLTSS Connect-a-Thon**
  - ✓ Key players included a HIE-type actor, supported employment, case management, and individual care provider actors
- **Participation Results:**
  - ✓ Successfully demonstrated exchange of person-centered plan of care across clinicians and social service providers for care coordination
  - ✓ Successfully completed data exchange across multiple FHIR servers (Firely, Microsoft, HAPI), multiple EHR systems and multiple facilities
- **Next Steps:**
  - ✓ Encourage adoption of the eLTSS standard through proof of concept projects with HCBS provider organizations to inform and incorporate standards of care
  - ✓ Develop a three-year HCBS VBP Roadmap

# DD PURSUIT TO VALUE-BASED PURCHASING

## ▶ Online Case Management System:

- ❑ FEI Systems has been acquired as DD's case management system vendor
- ❑ Implementation of ConneXion system is in progress and slated to go-live in Fall of 2022

## ▶ Health IT Integration:

- ❑ Focus on the identification and harmonization of electronic standards that can enable the creation, exchange, and re-use of interoperable ISPs for use by health care and community-based long-term services and supports providers, payers and clients

## ▶ HCBS VBP Roadmap Creation:

- ❑ Goal:
  - ❖ To advance Division and cross-agency strategies while building a reusable technical infrastructure via structured electronic data flow resulting in allowing person-centered care
- ❑ Current planning work includes:
  - ❖ Technical planning
  - ❖ Program development
  - ❖ Outcomes measurement;
  - ❖ Value-based payment models serving individuals with IDD
- ❑ Outcome:
  - ❖ Inform the long-term vision for broader health IT integration
